## **FOR IMMEDIATE RELEASE**

### **Bayada Nurses Expands Services in Wilmington to Meet Local Needs Homemaker, Companion, and Chore Services are Now Available**

September 16, 2008 – Wilmington, DE – Bayada Nurses, a nationally recognized leader in the home health care industry, is pleased to announce the addition of homemaker, companion, and chore services to residents in the Wilmington area. The demand for these services has grown significantly as the adult population ages with the desire to remain at home with comfort, independence, and dignity.

Services include bathing, dressing, grooming, meal preparation, companionship, light housekeeping, laundering, and running errands. Available 24 hours, 7 days a week on a personalized schedule, all services are provided by thoroughly screened, fully insured caregivers and are supervised by a registered nurse (RN).

“Bayada Nurses is making it possible for local residents to receive these services with peace of mind,” said Jean Mullin, director. “We are licensed, accredited, and all of our caregivers are Bayada employees who have passed rigorous screening. We only hire employees who are committed to our core values—compassion, excellence, and reliability.”

Requests for service are not limited to aging adults. Many young couples who are starting families enjoy the convenience of having a dedicated professional to assess their needs and assist with grocery shopping, preparing meals, and running errands.

“We are proud of the level of service we provide,” said Karesa Blagrove, client services manager. “We not only provide an RN for the initial assessment, but we also follow up with monthly assessments and RN supervision on all levels of care—a detail that really set us apart in this market.”

Founded in 1975, Bayada Nurses is an independently owned home health care agency that provides skilled, rehabilitative, therapeutic, and personal care services to children, adults, and seniors at home. Bayada Nurses employs over 12,000 nurses, home health aides, and therapists working from more than 130 offices in 17 states.
